

# GETTING YOUR PRODUCT TO MARKET ON TIME, ANYTIME AND ANYWHERE

## Immediate access to resource, with a global footprint

Timing is everything when it comes to getting pharma products to the international market. Packaging supply has an important part to play in time-to-market – shortages in material supply or issues with imports and exports can lead to delays in the delivery of finished products. This can have significant consequences, negatively impacting on costs for you and potentially leading to product treatment shortages for patients.

There are a number of challenges faced by pharmaceutical companies in getting their packaged products to market on time:

- ▶ Securing a reliable and consistent supply of packaging materials and other ingredients
- ▶ Optimising production flexibility and agility to adapt to changing market needs
- ▶ Understanding and complying with legal and trading requirements when importing and exporting across the globe
- ▶ Ensuring optimum quality, whatever the market

## Post-Brexit challenges

The UK's withdrawal from the EU also poses challenges for pharma companies on both sides of the Channel as they navigate post-Brexit trading arrangements. They need support in understanding the new requirements when importing and exporting over the UK/EU border as part of the market's "new normal".

## Recipharm can help

At Recipharm we understand that sometimes speed is of the essence when it comes to getting your products to market.

Our reliable, accessible primary and secondary capabilities, global footprint and local knowledge can give you access to high-quality resource when and where you need it. We also offer dedicated post-Brexit trading expertise to help you ensure reliable and consistent supply in the UK/EU.

We have 15 facilities with commercial packaging capabilities across 7 different countries offering a range of services to support you in delivering your products to wherever in the world they are needed as quickly as possible.

From bulk manufacturing and packaging of solids into blisters, sachets, stick pads, as well as bottles and jars, to liquids, to the fill and packaging of inhalation and anaesthetic products, our global sites can support you, whatever you require.

## Our offering

Recipharm is ideally placed to help you get the international packaging support you need. Our business's global footprint and worldwide logistics operations means we can provide you with well established, secure and reliable supply routes, wherever and whenever you need them. As a result, we can make registration as easy and straightforward as possible for you.

We offer flexible capacity, when and where you need it. Recipharm even offers continuous tablet manufacturing at key global sites for improved efficiency and even faster delivery times. The wider Recipharm development and manufacturing offering can help streamline supply chains, further reducing time to market.

We understand the importance of speed without compromising on high quality and are committed to delivering both to you time after time.

## Regulatory compliance

Our specialist sites can ensure manufacturing in compliance with a wide range of global regulations, including, but not restricted to:

- ▶ UK Medicines and Healthcare products Regulatory Agency (MHRA) (EU GMP)
- ▶ US Food and Drug Administration (FDA)
- ▶ Korean Ministry of Food and Drug Safety (MFDS)
- ▶ Japanese Pharmaceuticals and Medical Devices Agency (PMDA)
- ▶ Brazilian ANVISA
- ▶ Turkish Ministry of Health (MOH)
- ▶ Russian Ministry of Health (MOH)

Most of our global sites are certified according to the environmental management system ISO 14001.

**About Recipharm:** Recipharm is a leading contract development and manufacturing organisation (CDMO) headquartered in Stockholm, Sweden. We operate development and manufacturing facilities in France, Germany, India, Israel, Italy, Portugal, Spain, Sweden, the UK and the US and are continuing to grow and expand our offering for our customers.

Employing around 9,000 people, we are focused on supporting pharmaceutical companies with our full service offering, taking products from early development through to commercial production. For over 25 years we have been there for our clients throughout the entire product lifecycle, providing pharmaceutical expertise and managing complexity, time and time again. Despite our growing global footprint, we conduct our business as we always have and continue to deliver value for money with each customer's needs firmly at the heart of all that we do. That's the Recipharm way.
