

API RANGE

At Recipharm we run a multi-purpose plant in Paderno Dugnano, Italy that can manufacture several active pharmaceutical ingredients (APIs) at a time. Different batch sizes are available, ranging from a few grams to hundreds of kilograms, supporting early development and commercial needs. The site focuses on generic API development and manufacturing for global customers, backed by high-quality regulatory documentation (CEP, DMF, ASMF) and global submission support with rapid responses to authority requests.
